

JEREMY HUNT

The Right Choice for South West Surrey

December 2019

Dear South West Surrey Resident

Rarely has a General Election been so important for the future of our country.

Only one of two people can be our next Prime Minister.

One - against the odds - has delivered a Brexit deal and now wants to invest in our public services, especially our schools and hospitals.

The other, Jeremy Corbyn, detests what Britain stands for. He would destroy our economy with huge increases in tax and borrowing that would mean less money for the NHS. He would destroy our standing in the world with his support for countries like Russia and Venezuela. Most of all he would destroy opportunities for young people who would see their future snatched away.

Since the financial crisis of 2008, made much worse by the last Labour government, we have worked hard to rebuild our economy. We have created 1,000 new jobs every single day since 2010 for young people. We have raised standards in schools, put money into the NHS and reduced CO² emissions by more than any other major country to tackle the climate emergency.

A vote for the LibDems will help Jeremy Corbyn reach Downing Street. The LibDems can't win a majority - but they can deliver three more years of confusion if they hold the balance of power.

There is no greater honour than to represent the area you grew up in. Because I love our area, I have always focused on local priorities whatever my national responsibilities. But this time it is the future of our country I hope you will think about when you vote on 12 December.

Please consider our desperate need to move on from Brexit paralysis which can only happen with the sensible deal that has been negotiated.

Think too about the risks to our economy of a radical Marxist government.

And think most of all about our children and grandchildren and the safe, secure and sustainable future we want them to have.

For their sakes, please vote Conservative and let's build that future together.

Yours ever
